Arizona Together for Impact is a statewide pilot initiative of Arizona Grantmakers Forum to improve the capacity and financial health of nonprofits. The initiative has committed approximately \$1.5 million over three years to provide resources to organizations seeking to become more effective through strategic partnerships.

There is power in going beyond organizational boundaries and doing together what we may not be able to do alone. We believe that by providing resources for strategic partnerships, collaborations and shared services, we can strengthen the entire sector and ensure that vital nonprofit services are available to our communities for the foreseeable future.
